DECLARATION

CIVIL SOCIETY PARLIAMENT OF GREECE

“A ghost wanders nowadays over Greece. The ghost of the active citizens”..

CITIZENS who have made sure that our society functions with a solid deficit of democracy, unworthiness, extended corruption and opacity. A society witch destroys every significant initiative that happens not to be taken by the channels of the political and economical authority.

CITIZENS who do not expect from the “invisible hand” of the Market Sector to share among them the social equality and prosperity. Citizens who do not fancy, any more, an effective state, capable to carry out its very dear solid role.

CITIZENS who are tired to base their hopes and dreams upon big words and sweeping visions.

CITIZENS who become every day disappointed in a country that continues to wound them.

CITIZENS who have understood that in our country they don’t select the right choices as well the whole social environment is based on rotten basis foundations

WE are “the unknown” active citizens,

WHO have established non governmental- non profit Organizations after decided that we have the right for a better life than that they offer us

WHO support every day the dreams of life of the less privileged people,

WHO create culture in order to find ourselves non obliged to consume it as a mass

WHO protect the environment where we live with our children

In the country where Democracy was born, let us build upon a new Institution ,

out of political- ideological status, out of the traditional syndicalistic, political-ideological parties, religious institutions and marketing

A New Institution, where Organizations of Civil society will act together, equally and democratically. Which will express all the active citizens who, indeed, care... Which aims the creation of an open, just and democratic Society, where every one feel "citizen" and not "obedient"

Moreover, we have to incite, inspire and force other Institutions in order to fulfill their social obligations or constitute a right Institution of justice

Which will create itself "reactions" for maintaining its independence ,under non obligations as well to reduce the opportunism and the "interventions"

Which will provoke a real social development

Which will cause reactions to the whole spectrum of the social, economical and political life of our Country.

We built up,

The Greek "Parliament of Civil Society"

- Self-Organizing of the Non-Governmental Organizations, according to democratical procedures
- Equal participation for all the Non- Governmental Organizations in taking decisions, voting and demanding
- Encouraging all the real Non-Governmental Organizations, authority to none of them
- Self-Regulation and creation of Principles issued by the Governmental Organizations

- Creations of fertile environment for our development
- Independence from the State and Marketing and right competition between us in order to become better and more effective to our aims
- Voluntary cooperation for bigger achievements and new wins, for a better society without exclusions

For this initiative we don't intend to ask the permission of anyone for going forward

For this effort we need the help and the support of the active citizens who are still able to dream
